

Woke up from a bad dream I didn't know where I was You gotta live through this hard life See it's a mean place for our love to live	To the world was burning down I didn't know which town And get it right at first tryin' I'm afraid you're still mine
--	---

And we can make it through somehow When the game gets rough	If we hold tight and stay true We can play rough too
--	---

It's gonna take To keep us apart Rough and tumble with me!	The National Guard When things get hard Rough and tumble, baby... yeah!
--	---

There are people out there waiting They'll take what they get from us	With a handshake for a smile They got no truth and no style
--	--

But we'll make it through somehow It's a dangerous game	If we hold tight and stay true But you got me and I got you
--	--

Cos love's the good thing When the world gets cold Rough and tumble with me!	That we got We're still hot Rough and tumble, baby, it's alright
--	--

[Solo]

Cos love's such a good thing, baby When the world cools down	And we've got a lot We'll still be hot
---	---

It's gonna take To keep us apart Rough and tumble with me	The National Guard When things get hard And we'll make it, baby
---	---

Rough and tumble with me Rough and tumble with me, yeah	It's a hard world Be my girl... yeah!
--	--

Rough and tumble... Rough and tumble, baby	Free from mine! Yeah!
